

SuperPrice Sprint Planning Notes

Team: P01-08

Sprint: 2

Date: Wednesday 16 September 2023

Attended:

Scrum Master: Issa Chanzi

Product Owner: Charlie Earnshaw

Development team: Vincent Daniele (s3780417), Ethan Herpich (s3935413), Vladislava Simakov (s3910159)

1. Goal

We want to finish requirements of Milestone 1

By the end of milestone 3 we are aiming to release a fully finished product. At the moment the application runs at a basic level to achieve: An application that helps users to find groceries, compare prices and help them save money. In this coming sprint we will develop a better backend system that incorporates a full relational model, as well as a more consistent, organised and aesthetic frontend. The non-functional requirements will be addressed and focused on.

2. Duration of the sprint

3 weeks

3. What is the team's vision for this sprint?

More functionality for the app, including all the remaining user stories will be implemented. The quality of each part of the app will be improved, this will include making all code and features as consistent as possible.

A great focus will be placed on improving the user friendliness of the app.

4. Estimation in story points

See the github project board for an estimation of story points based on user stories.
