

# Description of scrum process

We met regularly twice per week, every Wednesday and Friday. We also organised additional meetings where necessary to coordinate work for upcoming deadlines.

Issa Chanzi <[s3783615@student.rmit.edu.au](mailto:s3783615@student.rmit.edu.au)> was the scrum master.

This chart shows the velocity of the team.

## Sprint velocity

We were generally behind schedule, with less velocity at the start of each sprint, and pushed to finish work before major deadlines.
